

Fusion Narrate

The Premier Radiology Speech Recognition Solution

**Fusion
Narrate®**
Powered by nVoc™

Achieve hands-free radiology reporting.

Fusion Narrate offers highly accurate radiology-specific speech recognition and fully customizable voice navigation. Fusion Narrate is lightweight and versatile, accommodating radiologists who prefer real-time speech recognition and workflow automation, as well as those who favor traditional dictation and transcription methods.

Automate any and all parts of the radiology workflow with the Fusion Narrate shortcut builder. The easy-to-use shortcut builder allows users of any technical level to utilize hands-free navigation, customizable text templates, and multi-step automation. Fusion Narrate shortcuts range from opening applications and inserting text to browser automation and Dolby's patented Vision Click®, which ensures shortcut capability across screen sizes and monitors.

Fusion Narrate is designed with seamless integration and compatibility in mind. Fusion Narrate provides direct text entry and workflow automation within any RIS, PACS, or other reporting software without the need for special integrations. In addition, Fusion Narrate allows the use of any microphone or foot control.

Features Tailored to Radiology

- ✓ Radiology-specific speech context
- ✓ Direct text placement within any RIS/PACS
- ✓ Custom interface support
- ✓ Window locking for simultaneous text entry and navigation across multiple screens
- ✓ Front-end, back-end, and dictation workflows

Improve Productivity with Fusion Narrate

With Fusion Narrate shortcuts, medical professionals have saved over 3 billion keystrokes to date. Navigate and automate your RIS, PACS, and more, hands-free, with the power of your voice.

Endless Flexibility: Fusion Narrate empowers radiologists with a variety of dictation options that include:

- Front-End Speech Recognition and Workflow Automation
- Back-End Speech Recognized Dictations
- Traditional Dictation and Transcription

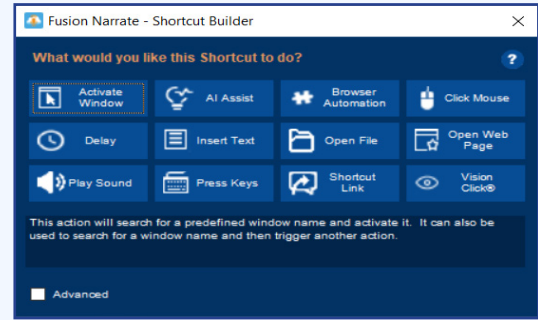

This flexibility allows Fusion Narrate to meet the individual, departmental, divisional, or case-by-case needs and preferences of every user, all from the same application.

Configurable Voice Shortcuts

Fusion Narrate offers shortcut capability to automate repetitive actions and eliminate click fatigue in the completion of radiology reporting.

With Fusion Narrate shortcuts:

- **Insert formatted text**
- **Access clinical reference content while dictating**
- **Generate suggested impressions and recommendations with AI Assist shortcuts**
- **Import or create templates with default values or variable fields**
- **Turn routine or complex tasks into simple voice commands, such as “zoom”, “measure”, “add note”, and “sign report”**

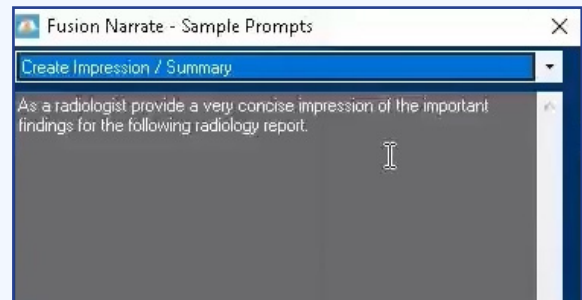

Create custom voice commands and multi-step shortcuts without the need for special tools or advanced technical knowledge. Shortcuts can be created and used in any application, without restriction, to further automate your workflow.

AI-Powered Workflow Automation

With Fusion Narrate AI Assist, radiologists can directly integrate generative AI while reporting to drastically improve productivity. AI Assist allows for text analysis, summarization, transformation, and generation.

AI Assist offers high-value, targeted prompts out of the box, such as the generation of suggested impressions and recommendations or summarizing notes within a report. Custom AI Assist commands can also be created to build unique AI-driven workflows.

When used in conjunction with other configurable voice shortcuts within Fusion Narrate, AI Assist offers incredibly versatile automation capabilities.

AI Assist for Fusion Narrate allows for automatic suggested impression and recommendation generation.

AI Assist offers high flexibility to accommodate other tasks, including AI-generated reporting data and direct data entry into reports.
